

Senior Design Architect:
J and B Engineering (Newfoundland) Inc.

The St Johns Newfoundland design team of J and B Engineering (Newfoundland) Inc. is seeking a full time qualified senior design architect to join its growing, highly collaborative design practice. Ideal candidates must have a degree in architecture with a minimum of 5 to 10 years of experience. Architectural license is required; LEED AP accreditation is a plus.

Applicants must demonstrate their commitment to design excellence through recent project examples and must have strong effective presentation and leadership skills. Experience in AutoCAD is required. Your responsibilities will include:

- Ø Project management including all associated responsibilities: client relationships, design team alignment and overall project QC/QA.
- Ø As a full time position in association with J and B Engineering (Newfoundland) Inc. you will be responsible at times to lead design activities and at times to be a design team member.
- Ø Space planning and interior design is the initial focus for your assignments. You will develop detail drawings for construction and renovation work.
- Ø You must be in good standing with your association
- Ø You must have a valid driver's license.
- Ø A criminal background check is required to start of employment.

Qualified candidates should submit a cover letter that includes salary requirements and availability, a resume outlining experience and work examples.
